

## **Sprint 4 Report, Share Yourself Artists, SYA Artists Team 1, 12/2/18.**

• **Actions to stop doing:** Team should stop writing unorganized, undocumented code that does not follow coding standards. A few parts of the app, particularly the older code segments were put together by one person, and it is difficult to understand these segments without the original coder present.

• **Actions to start doing:** The team needs to better plan meetings in advance to enable everyone to arrive at the correct time. We often have impromptu meeting times with staggered attendance because people arrive on their own.

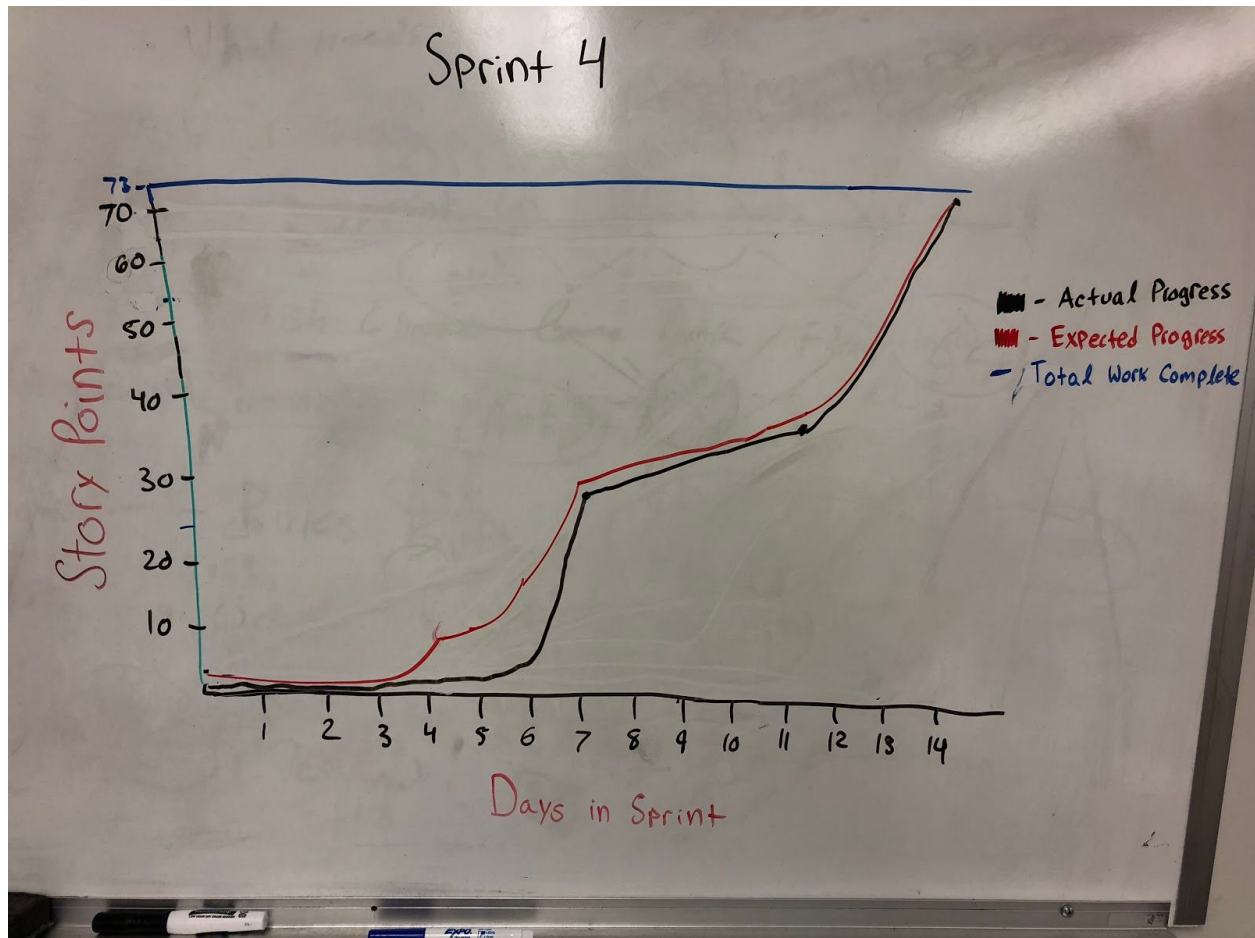

• **Actions to keep doing:** Continue to continuously integrate features, connecting the backend and frontend quickly and as needed. Backend should write API's and return the needed information while the frontend receives and formats the data.

• **Work completed/not completed:** This is a list of the user stories that were completed during the previous sprint, and a list of the user stories not completed during this sprint (but which were part of this sprint, and were in the sprint plan).
